

ExoCake

Backed by nearly 30 years of expertise in biotechnology and regenerative medicine, BIONET Taiwan introduces ExoCake— a premium lyophilized powder exosome product containing over 10 billion exosomes per 150 mg vial and enriched with key growth factors and miRNAs. By facilitating cellular communication, ExoCake supports tissue repair, regeneration, and healthy cellular function.

Designed for room-temperature stability and professional use, ExoCake delivers consistent purity, quality, and performance across a wide range of regenerative applications.

ExoCake Rich in miRNA

Anti-Aging & Renewal

Enhance
Radiance

Restore
Elasticity &
Firmness

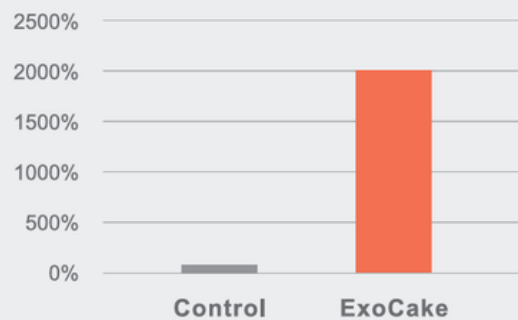

Strengthen Hair
Roots &
Revitalize Scalp

Boost Defense
Against
Environmental Stress

Restore Skin Elasticity

+1945%
Collagen Activity

Type III Collagen protein levels

AI-driven selection for high-performance exosomes

Surface protein profiling for precise exosome selection

AI-powered miRNA profiling predicts exosome functionality

High-purity exosomes with consistent quality and performance

Produced under strict quality control in a PIC/S GMP-guided facility

AI × Exosome

Nearly 30 Years of Expertise in Evidence-Based Regenerative Medicine

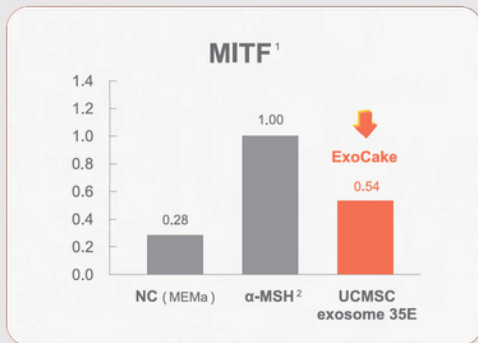

ExoCake is developed using AI-powered functional exosome screening based on miRNA and surface protein profiling, and produced in a PIC/S GMP-guided facility to ensure consistent quality, purity, and performance.

Exosome Concentration	> 10 billion / vial
Specification	Lyophilized powder 150 mg
Storage	Room temperature
Usage Instructions	Mix with normal saline (3-6ml) or essence: Clinical treatment procedures or topical application
Quality Assurance	✓ Identity Markers ✓Sterility ✓Mycoplasma ✓Endotoxin
Bioactive Molecule Verification	✓Total miRNA ✓Total Protein ✓Growth Factors
Functional Validation	Verified
Certificate of Analysis	Available
NPRA Cosmetic Notification (NOT)	Registered

Every production batch is rigorously tested for quality, safety, bioactive content, and functionality before release..

Fades Dark Spots

ExoCake demonstrates superior efficacy in melanin regulation, outperforming other sources in skin brightening, dark spot reduction, and overall tone uniformity.

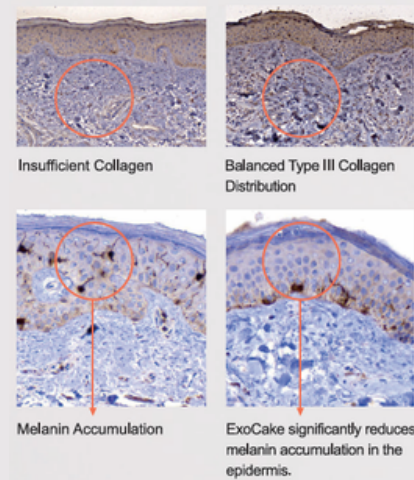

1 : MITF - Melanocyte Inducing Transcription Factor
2 : α-MSH - α-Melanocyte Stimulating Hormone

Visible Improvement: Noticeable reduction in dark spots after 1.5 months of use.

ExoCake promotes even distribution of Type III collagen, enhancing skin softness and elasticity.

Exceptional Purity
50-200nm nanoparticles

Rapid Absorption
Lipid bilayer structure enables efficient delivery

High Biocompatibility
Gentle and non-irritating

Maximum Repair
Rich in miRNA
